

Mr. Bones Relay Race*

What You Need

- Skeleton Template
- Printer Paper
- Craft Foam & Glue, optional
- 2 Bowls
- Poster Board & Double-Sided Tape, optional

Instructions

1. Before the party, create the parts for complete skeletons (you'll need 1 for each team) by printing them here.
2. Cut out all the parts. You can glue them onto craft foam or just use the paper parts.
3. At game time, divide players into teams of 2 or more and place each team's parts in bowls across the room.
4. At "Go," team members take turns retrieving 1 part from the bowl to build their skeleton. Players can assemble their skeletons on a flat surface or use double-sided tape to stick them to poster board mounted on a wall. The first team to correctly complete its skeleton wins.

Variations:

For an added challenge, put all of the parts together in a single bowl.
