

Bottle Pumpkin

by Dottie Bronsod

Kids will love putting these super easy pumpkins together. Make a whole bunch of them to decorate for a Halloween party or to set out on the porch!

You will need

**empty 2 liter plastic bottle
orange acrylic craft paint
4-6 green chenille stems
4 large green silk leaves
paint brush
hot glue gun
acrylic sealer spray
sand or kitty litter**

What you do

Wash and dry bottle completely. Add something heavy inside the bottle such as sand or kitty litter to keep them from tipping over.

Paint entire surface with orange paint and let dry.

When paint is dry, wrap chenille stems once around the neck of the bottle, hot glue in place. Make cork screw designs with the ends of the chenille stems by wrapping them around a pencil then sliding the pencil out.

Hot glue leaves to the ends of the chenille stems.

Spray with acrylic sealer.

Paint a face on your pumpkin as in the photo below.
